SUMMARY

Full-stack developer with 3+ years building and shipping production web applications end-to-end — from enterprise internal systems deployed across an 8,000-employee manufacturer to independently launched SaaS products. Comfortable across .NET and modern JavaScript stacks (ASP.NET Core, Angular, Next.js), with a focus on clean, maintainable code and delivering working systems to production.

SKILLS

Languages: C#, TypeScript, JavaScript, SQL, Python, Java

Frameworks & Libraries: ASP.NET Core (MVC & Web API), Angular, Next.js, React, Express.js

Cloud & Data: Azure (App Service, Static Web Apps), Supabase, PostgreSQL, SQL Server, Docker

DevOps & Tools: CI/CD, Git, GitLab, IIS, Postman

EXPERIENCE

Toshiba Information Equipment Inc. — Full-Stack Developer

April 2024 – Present

- Designed, developed, and deployed an **Electronic Resignation & Clearance System** as sole developer (end-to-end, on-premise), deployed across an **8,000-employee site** — digitizing a fully paper-based process, **processing 2,500+ resignations in 2 years**, and cutting clearance turnaround from **weeks to days**.
- Spearheaded adoption of **ASP.NET Core 8 MVC** and on-premise **GitLab**, building a reusable starter template now used as the **team standard by 5+ developers** to bootstrap new projects.
- Built a **Project Management System** with task tracking, status monitoring, and role-based access control, improving project visibility and coordination across teams.
- Developed an **Employee Information System** centralizing employee records into a single searchable source for the 8,000-employee site.
- Provided ongoing support and maintenance across production applications — resolving bugs, shipping enhancements, and handling operational issues.

PROJECTS

Independent full-stack and freelance builds since 2023, outside of full-time work.

Certify+ — SaaS Certificate Platform

Next.js, Supabase · certify.cybernestsolution.com

SaaS platform for schools and training centers to design, bulk-generate, and verify certificates. Built a **drag-and-drop template builder**, **CSV-driven bulk generation**, automated email delivery, and a public **QR-code verification** flow, with SEA-based hosting for data-privacy compliance.

Peyg — SaaS Site Builder & Lead Capture

Next.js, Supabase · peyg.app

SaaS platform that lets sellers and freelancers launch a branded mini-site with structured lead capture in **~5 minutes**. Built subdomain provisioning, a business-verification workflow, and an inquiry/lead management system that converts scattered social-media messages into organized, trackable leads.

BPLO Queueing System — Government Service Platform

Full-stack · Biñan, Laguna

Led the technical build — backend, frontend, and on-premise deployment — of a queueing system for the Biñan Business Permit & Licensing Office as part of a small team. Handles **100–500 citizens daily** and scales to **thousands during peak BOSS (Business One-Stop Shop) events**.

Client Websites & CMS

Full-stack · multiple industries

Designed and deployed production websites with content-management functionality across F&B, rentals, real estate, and manufacturing — including Inokuchi Coffee Bar, Orbit360, StayFlix, AeroComp, and Eneda.

SPEAKING & COMMUNITY

- **Fireside Chat Panelist — Innobazaar 2026, Cohort 2 Demo Day** · DOST · PUP Pylon TBI (2026). Invited panelist sharing hands-on lessons on building software products and taking them from prototype to market with the incubator's startup founders.
- **Startup Pitch — Cohort 1 Pitching & Demo Day** · DOST · PUP Pylon TBI (June 2025). Pitched a product venture to a panel of DOST, DTI, and investor judges as an incubatee of the DOST-backed Technology Business Incubator.
- **Workshop Speaker — "Wired for the Web" Arduino Seminar** · ACES, PUP College of Information Technology and Engineering (June 2026). Led a hands-on embedded-systems workshop for Computer Engineering freshmen — from the first Arduino "Blink" sketch to sensor-driven mini-projects.

EDUCATION

Bachelor of Science in Computer Engineering — Polytechnic University of the Philippines (PUP)

2019 – 2023
